

COMP3520 Operating Systems Internals

Assignment 1

Part 1 Marking Scheme

Source Code

| Criteria | Mark /10 |
|---|----------|
| <ul style="list-style-type: none"> • Demonstrates mastery of relevant synchronization concepts • Successfully implements an optimal solution that fully meets the assignment requirements with no errors or omissions • Codes with expertise, demonstrating exemplary skills in producing correct human-readable source code that compiles on the School of Computer Science servers | 10 |
| <ul style="list-style-type: none"> • Demonstrates thorough understanding of relevant synchronization concepts • Successfully implements an optimal solution that meets the basic coding requirements with, at most, two minor errors or omissions • Demonstrates excellent skills in producing human-readable source code that compiles on the School of Computer Science servers | 9 |
| <ul style="list-style-type: none"> • Demonstrates broad detailed understanding of relevant synchronization concepts • Implements an optimal or near-optimal solution that meets the basic coding requirements but with a few minor errors or omissions • Demonstrates excellent skills in producing human-readable source code that compiles on the School of Computer Science servers <p>OR</p> <ul style="list-style-type: none"> • Demonstrates thorough understanding of relevant synchronization concepts • Successfully implements an optimal solution that fully meets the assignment requirements with, at most, two minor errors or omissions • Demonstrates well-developed skills in producing human-readable source code that compiles on the School of Computer Science servers | 8 |
| <ul style="list-style-type: none"> • Demonstrates broad detailed understanding of relevant synchronization concepts • Implements an optimal or near-optimal solution that meets the basic coding requirements but with a few minor errors or omissions • Demonstrates well-developed skills in producing human-readable source code that compiles on the School of Computer Science servers <p>OR</p> <ul style="list-style-type: none"> • Demonstrates thorough understanding of relevant synchronization concepts | 7 |

| | |
|--|---|
| <ul style="list-style-type: none"> • Successfully implements an optimal solution that fully meets the assignment requirements with, at most, two minor errors or omissions • Produces source code that that compiles on the School of Computer Science servers but that is not always readily human-readable | |
| <ul style="list-style-type: none"> • Demonstrates satisfactory understanding of relevant synchronization concepts • Implements a sub-optimal solution to the problem, containing some errors or omissions but which meets the basic coding requirements • Demonstrates well-developed skills in producing human-readable source code that compiles on the School of Computer Science servers <p>OR</p> <ul style="list-style-type: none"> • Demonstrates broad detailed understanding of relevant synchronization concepts • Implements an optimal or near-optimal solution that meets the basic coding requirements but with a few minor errors or omissions • Produces source code that compiles on the School of Computer Science servers but that is not always readily human-readable | 6 |
| <ul style="list-style-type: none"> • Demonstrates satisfactory understanding of relevant synchronization concepts • Implements a sub-optimal solution to the problem, containing some errors or omissions but which meets the basic coding requirements • Produces source code that compiles on the School of Computer Science servers but that is not always readily human-readable | 5 |
| <ul style="list-style-type: none"> • Demonstrates limited understanding of relevant synchronization concepts • Implements a flawed solution to the problem, containing substantial errors or omissions • Demonstrates basic programming skills, producing flawed source code that compiles on the School of Computer Science servers | 4 |
| <ul style="list-style-type: none"> • Demonstrates elementary understanding of some relevant synchronization concepts • Implements a fatally flawed solution to the problem, containing major errors or omissions • Demonstrates genuine engagement with the set programming problem but limited programming skills, producing fatally flawed source code that compiles on the School of Computer Science servers | 3 |
| <ul style="list-style-type: none"> • Demonstrates rudimentary understanding of some relevant synchronization concepts • Produces incomplete source code that compiles on the School of Computer Science servers and that contains some evidence of superficial engagement with the set programming problem <p>OR</p> <ul style="list-style-type: none"> • Demonstrates some understanding of some relevant synchronization concepts • Produces relevant source code that does not compile on the School of | 2 |

| | |
|---|---|
| Computer Science servers but that contains some evidence of genuine engagement with the set programming problem | |
| <ul style="list-style-type: none"> • Demonstrates minimal or no understanding of relevant synchronization concepts • Produces seriously incomplete source code that compiles on the School of Computer Science servers and that contains minimal evidence of superficial engagement with the set programming problem <p>OR</p> <ul style="list-style-type: none"> • Demonstrates rudimentary understanding of some relevant synchronization concepts • Produces incomplete source code that does not compile on the School of Computer Science servers and that contains some evidence of superficial engagement with the set programming problem | 1 |
| <ul style="list-style-type: none"> • Disqualified by the COMP3520 marker for any ONE of the following behaviours: <ul style="list-style-type: none"> ○ Engaging in an aggravated non-serious attempt in the source code ○ Engaging in a virtual non-attempt in the source code ○ Failing to submit source code <p>OR</p> <ul style="list-style-type: none"> • Disqualified by the Faculty of Engineering or the University due to academic dishonesty or misconduct in this assignment | 0 |
